## EDUCATION

2022 – 2024 Advanced Technician in Web Application Development  
CIFP Zonzamas

2024 – 2025 Specialization in AI & Big Data  
CIFP Zonzamas

## PROJECTS

Queater • Frontend Developer  
2024

Web application designed to optimize restaurant service. Customers access the menu and place orders via QR codes at each table, reducing staff workload and improving efficiency.

Toti Sanz • Web Developer  
2025

Design and development of the official website [totisanz.com](#) for the artist Toti Sanz, conceived as a modern, visual, and fully responsive digital experience. The project prioritizes performance, SEO, and smooth navigation across musical content, live shows, merchandise, and community sections.

Development of a scalable architecture with smooth animations and refined transitions, along with deployment and domain infrastructure setup. Implementation of a contact system with validation and email delivery, focused on enabling direct and modern communication with the artist.

Design and development of my personal portfolio [brianramirez.dev](https://brianramirez.dev), conceived as a modern, minimalist, and fully responsive digital experience. The site showcases my skills, experience, and projects as a Full-Stack Web Developer, with a strong focus on performance, content clarity, and smooth user experience.

The project is built with Next.js 14, React, and Tailwind CSS, incorporating advanced animations with GSAP, smooth scrolling with Lenis, and interactive elements using Three.js. It includes multilingual support (ES / EN), light and dark modes, direct CV download, and a contact form with type-safe validation and email delivery via Resend using Server Actions.

The architecture is optimized for scalability and maintainability, featuring reusable components, custom hooks, and decoupled animations. Deployment is handled on Vercel, leveraging edge runtime, ISR, and continuous deployment integrated with GitHub.

## WORK EXPERIENCE

---

### **artek** Artek Soluciones Informáticas • Full Stack Developer

2024  
2 months

Worked on MVC-based architectures, developing SOAP and REST APIs and implementing CRUD features with PHP and JavaScript, adhering to best practices in code quality and application structure.

### **J&C** JC Tus Asesores • Full-Stack Developer & IT Support Technician

2025  
12 months

End-to-end design and development of the corporate website [jctusasesores.com](https://jctusasesores.com), built with modern technologies such as Astro and Tailwind CSS, with a strong focus on performance, SEO, and accessibility. Implementation of a proprietary database and development of a system that automates the retrieval of asylum-related data from official BOE publications, along with a fully functional contact form with validation and email delivery.

In parallel, full management of the hotel's IT systems, including maintenance, technical support, and continuous improvement of the technological infrastructure. Responsible for resolving level 1 and 2 incidents, coordinating with external vendors (Protel PMS, Microsoft Dynamics NAV), and tracking support tickets through to resolution. Led the planning and procurement of IT equipment (networking, security cameras, peripherals) and implemented a digital ordering system, improving operational efficiency.

# SKILLS & COMPETENCIES

---

## Hard Skills

### Frameworks

Laravel React Astro Next JS

### Frontend

JQuery HTML5 CSS Tailwind

### Databases

MySQL

### Version Control

Git Github Gitlab

### Design & Presentation

Illustrator Photoshop PowerPoint

### Hosting & Deployment

Hostinger Netlify Vercel

### Languages

PHP JavaScript Python

### Communication & Services

Stripe Resend

## Soft Skills

Analytical Thinking

Agile Methodologies (Scrum)

Teamwork

Adaptability
